

Intelligent Personalized Care

A solution to promote Physical Agility and Recovery

- ✓ About 20% of the world's population has musculoskeletal problems. We promote physiotherapist dematerialization and support the monitoring of the patient's progress
- ✓ Responds to the rapidly increasing sedentary lifestyle and isolation of the population, promoting physical exercise and rehabilitation
- ✓ Uses advanced Artificial Intelligence technologies to provide personalized and effective remote care for patients in different musculoskeletal health scenarios

Architecture

With
ML Kit

Functionalities

Connection
Connect with your physiotherapist

Camera
Record your own videos doing exercises

Feedback
Receive feedback from your physiotherapist

Exercise Library
