Organization Description

IPC – Intelligent Personalized Care
A Solution to promote Physical Agility and Recovery

Guilherme Cepeda
Tiago Martinho
Rodrigo Neves

Supervisor: Paulo Pereira, ISEL

Computer Science and Engineering Bachelor's degree - Project and Seminar
22/23

July 2023

I.   Project Repository

The implementation and documentation of the IPC – Intelligent Personalized Care project is publicly available through its GitHub repository, in the following link.

II.   Deployment

The backend/server of our project has been deployed using the **Google Cloud Service App Engine**. With this solution we can have the SQL database, Cloud storage and deployment all provided by the Google Cloud Services. That are several advantages of having the services provided by the same company like seamless integration, enhanced performance, infrastructure management and easier scalability.

III.   Resources

- GitHub Repository

- Project Proposal

- Progress Presentation
